## Personal Statement

Recent Computer Science graduate with First Class Honours (4.0 GPA), specialising in full-stack web development using React and Laravel. I have built and deployed modern web applications including an e-commerce platform with Stripe integration and a job board system with role-based authentication.

I am seeking a junior developer role where I can contribute to a collaborative team, continue learning, and grow as a software engineer.

## Technical Skills

Languages: JavaScript, PHP, SQL, Python

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend: Laravel, Express.js, RESTful API design

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Vercel, Render, Supabase

## Projects

### RoastLab — Full-Stack E-commerce Platform

React, Tailwind CSS, Laravel, PostgreSQL, Stripe

Live Demo: [roast-lab-theta.vercel.app](https://roast-lab-theta.vercel.app)

Source Code: [github.com/rahulgill/Roastlab](https://github.com/rahulgill/Roastlab)

Developed and deployed a full-stack coffee e-commerce platform allowing users to purchase products or create custom blends with dynamic pricing. Implemented server-side validation and order management using a Laravel API.

### Job Board Platform — Full-Stack Web Application

React, Tailwind CSS, Laravel, PostgreSQL

Live Demo: [job-board-frontend-two-sigma.vercel.app](https://job-board-frontend-two-sigma.vercel.app)

Source Code: [github.com/rahulgill/fullstack-job-board](https://github.com/rahulgill/fullstack-job-board)

Built a job board platform with role-based authentication, application tracking, and resume uploads using a decoupled React frontend and Laravel backend.

## Work Experience

### Technical Marketing Executive (Frontend Development)

Cannasa — Start-up Drinks Company | January 2022 – December 2023

Developed front-end website features, improved UI/UX, and built interactive forms for an early-stage startup. Collaborated on technical aspects of the company website and digital platform.
