Personal Statement

Recent Computer Science graduate with First Class Honours (4.0 GPA), specialising in full-stack web development using React and Laravel. Alongside developing and deploying modern web applications, I independently design, build, and maintain frontend websites for small businesses, managing everything from client communication and deployment to SEO optimisation and responsive design.

Technical Skills

Languages: JavaScript/TypeScript, PHP, SQL, Python

Frontend: React, Tailwind CSS, HTML5, CSS3, GSAP

Backend: Laravel, Express.js, RESTful API design

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Vercel, Render, Cloudflare, Supabase

Full-Stack Projects

RoastLab — Full-Stack E-commerce Platform

React, Tailwind CSS, Laravel, PostgreSQL, Stripe

Live Demo: roast-lab-theta.vercel.app

Source Code: github.com/rahulgill/Roastlab

Developed and deployed a full-stack coffee e-commerce platform allowing users to purchase products or create custom blends with dynamic pricing. Implemented server-side validation and order management using a Laravel API.

Job Board Platform — Full-Stack Web Application

React, Tailwind CSS, Laravel, PostgreSQL

Live Demo: job-board-frontend-two-sigma.vercel.app

Source Code: github.com/rahulgill/fullstack-job-board

Built a job board platform with role-based authentication, application tracking, and resume uploads using a decoupled React frontend and Laravel backend.

Work Experience

Freelance Frontend Web Developer

Self-Employed | Present

- Designed and developed responsive websites for small businesses in different industries across England
- Managed the full client lifecycle including outreach through social media, client communication, requirements gathering, development, deployment, and ongoing maintenance
- Built modern frontend applications using React, Tailwind CSS, HTML, CSS, TypeScript and GSAP
- Implemented SEO optimisation, performance enhancements, and mobile-first responsive design to improve usability across devices
- Hosted and maintained client websites using Cloudflare and custom domains
- Worked directly with business owners to create websites tailored to their branding, customer experience, and business goals

Example of my work:

- Cambridge Dog Boutique — cambridgedogboutique.co.uk

Further freelance projects available via portfolio.

Technical Marketing Executive (Frontend Development)

Cannasa — Start-up Drinks Company | January 2022 – December 2023

- Developed front-end website features, improved UI/UX for an early-stage startup. Collaborated on technical aspects of the company website and digital platform.
